VII. Unsolicited, Spam and Junk Mail

Spam and unsolicited bulk mail are highly problematic practices. They affect the use and enjoyment of services by others and often compromise network security. iTEAM will take swift and firm action against any user engaging in any of the following unacceptable practices:

1. Sending unsolicited bulk mail for marketing or any other purposes (political, religious or commercial) to people who have not consented to receiving such mail;
2. Operating or maintaining mailing lists without the express permission of all recipients listed;
3. Failing to promptly remove from lists invalid or undeliverable addresses or addresses of unwilling recipients;
4. Using iTEAMs' service to collect responses from unsolicited e-mail sent from accounts on other Internet hosts or e-mail services, that violate this AUP or the AUP of any other Internet service provider;
5. Including iTEAMs' name in the header or by listing an IP address that belongs to iTEAM in any unsolicited email sent through iTEAMs' network or not;
6. Failure to secure a customer's mail server against public relay as a protection to themselves and the broader Internet community. Public relay occurs when a mail server is accessed by a third party from another domain and utilised to deliver mails, without the authority or consent of the owner of the mail-server. Mail servers that are unsecured against public relay often become abused by unscrupulous operators for spam delivery and upon detection such delivery must be disallowed.

iTEAM reserves the right to examine users' mail servers to confirm that no mails are being sent from the mail server through public relay and the results of such checks can be made available to the user. iTEAM also reserves the right to examine the mail servers of any users using iTEAMs' mail servers for "smarthosting" (when the user relays its mail via a iTEAMs' mail server to a mail server of its own) or similar services at any time to ensure that the servers are properly secured against public relay. All relay checks will be done in strict accordance with iTEAMs' privacy policy

VIII. Spam/Virus Filtering

iTEAM provides a spam and virus filtering system to protect customers from unsolicited mail and viruses. The customer acknowledges that this system might incorrectly identify a valid message as spam or as a virus and consequently this message might not be delivered to the customer. The customer acknowledges and agrees that iTEAM shall without limitation have no responsibility for, or liability in respect of any data lost as a result of this system.

IX. Webmail

Webmail and other web based email services made available by iTEAM are provided on an "as is" basis without representations, warranties or conditions of any kind, and the customer acknowledges and agrees that iTEAM shall have no responsibility for, or liability in respect of, any aspect of the Webmail services, including without limitation for any lost or damaged data or any acts or omissions of iTEAM. Any unauthorised commercial use of the Webmail service, or resale of the Webmail service is expressly prohibited.
